

#### **§ 644.521**

will result in the same type of contamination, or who agrees to perform the necessary decontamination. Any decontamination work required will be monitored by USATHAMA who will also review the completed program for adequacy of decontamination. If these arrangements cannot be worked out, USATHAMA will decontaminate the property at the request of the Office, Chief of Engineers (OCE), or the property may be withdrawn from excess and returned to the using command for care and custody.

(b) A Statement of Clearance is required for industrial property to be declared excess in order to establish a qualitative and quantitative base line for the contaminants present. In the Statement, USATHAMA will provide an adequate description of the nature and extent of the contamination. The description furnished to the DE should include the following information:

- (1) Name and location of installation.
- (2) Date of final clearance.
- (3) Reference to attached real estate map showing locations of contaminated, cleared and restricted areas. The map(s) will be attached to the description of contamination.
- (4) Statement that the area has been cleared of toxic and hazardous materials reasonably possible to detect either by present state-of-the-art methodology or by a visual inspection.
- (5) Recommendation as to whether the land or structures may be used for any purpose for which it is suited, clearly identifying any areas recommended for restricted use and listing restricted tract and building numbers.

#### **§ 644.521 Limitations on clearance cost.**

The following principles are established for determination of the financial limit of clearance operations at excess installations:

- (a) *Government-owned land.* Clearance work will not be undertaken where the estimated cost thereof exceeds the value of the land after decontamination plus the estimated cost of keeping it security-fenced and posted for a period of 25 years.
- (b) *Leased land.* Clearance will not be undertaken where the estimated cost,

#### **32 CFR Ch. V (7-1-08 Edition)**

plus the cost of any other required land restoration work, exceeds the value of the land after clearance and restoration plus the estimated cost of keeping it security-fenced and posted for a period of 25 years.

#### **§ 644.522 Clearance of military scrap.**

Military scrap can contain or be contaminated with explosives, chemicals, and other hazardous materials. The primary consideration in determining whether scrap metal will be removed should be the safety of persons coming on the land in question and, secondarily, the prevention of accidents resulting from the sale and/or use of the scrap metal subsequent to the land passing from the jurisdiction of the Department. The DE will insure the removal or destruction, by using command, of all military scrap and scrap metal from lands suitable for cultivation or other subsurface operations. In the case of land unsuitable for cultivation or other subsurface operations, all military scrap will be removed or destroyed and scrap metal removed, if it is reasonably possible to do so. Cases where it is considered impracticable to remove the scrap metal, will be reported to DAEN-REM for final decision. In such instances, pertinent data and the recommendation of the DE will be furnished. Disposition of military scrap or scrap metal by dumping into inland waters or by land burial in other than an approved landfill is prohibited.

#### **§ 644.523 Restricting future of artillery and other ranges.**

Experience indicates that, on ranges where high explosive projectiles have been fired or dropped, such as artillery, bombs, mortars, rockets, grenades, and the like, it is impossible to make certain that land in impact areas is absolutely safe for unrestricted use. Such impact areas receive a high concentration of fire, and the properties of these projectiles are such that many duds are deeply buried. Depth of burial, as well as the concentration of fragments or components, will affect the dependability of mine detectors. Since there is no known definite period within which such projectiles will become inert through weathering and corrosion, such contaminated areas can be

## Department of the Army, DoD

## § 644.528

safely released for restricted use only, even after decontamination work has been carried to its practicable limit. Such restrictions will usually be in the form of a recommendation that the land be restricted to surface use only. Restrictions will be based solely on the type and/or extent of contamination. If land is contaminated to such a degree that it is considered it cannot be rendered safe for any use, disposal action will be suspended and the facts will be reported to DAEN-REM-C with the DE recommendations.

### § 644.524 Reporting contaminated land to the General Services Administration.

Contaminated areas, except industrial properties as covered by § 644.520 will not be included in a Report of Excess to GSA until such time as the affected areas have been cleared by the using command to the satisfaction of the DE and a Statement of Clearance has been received. If an exception is granted and the Department of the Army, with the concurrence of GSA, reports contaminated nonindustrial property excess, the report of excess will include statements concerning:

- (a) The extent and type of such contamination;
- (b) Plans for decontamination, if any; and
- (c) The extent to which the property may be excessed without future decontamination.

### § 644.525 Statement of clearance in reporting excess property to GSA.

The Report of Excess will include the Statement of Clearance furnished by the using command (§ 644.517). The record of the clearance work performed by the using command will not be included in the Report of Excess but will be preserved in the permanent records of the DE. It is anticipated in these cases that the disposal agency (GSA) will, at the time the land is offered for sale of lease, give public notice of the circumstances surrounding its past and future restricted use. Included in such notice will be the statement that the Department of the Army is willing to remove or destroy any potentially dangerous materials discovered at any

time in the future, subject to the availability of funds for this purpose.

### § 644.526 Reporting target ranges.

All Reports of Excess to GSA covering lands which have been used as target ranges of any kind will contain an affirmative or negative statement in regard to contamination. This will be by appropriate schedule and reference thereto in the following manner:

- (a) If the statement is negative, it will declare that no explosive or other contaminating materials were used or stored on any portion of the installation.
- (b) If the statement is affirmative, reference will be made to appropriate schedules of the Report of Excess containing statements of clearance on the installation, or portions thereof.

### § 644.527 Recording Statements of Clearance.

On property disposals for which the Corps of Engineers is the disposal agency, the DE will have the Statement of Clearance recorded, if possible, as part of the permanent history of the property involved, with the proper county land record office. A copy of the report of clearance work performed will be furnished DAEN-REM and DAEN-REP.

### § 644.528 Return of contaminated leased land to owners.

Where leased land has been contaminated, whether excess to military requirements or being used, it may often prove advisable and economical to acquire the fee to such properties. Prior to considering the return of contaminated leased land to owners, District Engineers will assist installation commanders in preparing an analysis as a basis for recommendation to acquire or not acquire such areas. In the case of recommended restriction of use, notice should be given the lessor as described in § 644.525.

- (a) Where such a restriction reduces the value of the land, the Department will, if consistent with the terms of the lease, pay damages equal to the reduction in value as of the effective date of termination.
- (b) As stated in § 644.525, the owner should be advised that the Department
